### ACH Debit Filters – Tandem HR Company ID’s

For various reasons, including fraud and asset protection within financial institutions, it is becoming more common that account holders in the United States, in particular businesses; request that their bank set up a “debit filter” on their bank account. The intention of the debit filter is to block all unauthorized ACH debit transactions to a specific account, making it less likely that an account holder will incur fraud. For ACH transactions that an account holder wants to be debited from their account, the account holder will give a listing of ACH ID’s to their bank, which will allow authorized debits to process. These debit transactions, or ACH ID’s, are identified by a 10-digit company ID. Tandem uses various accounts to send debits to our client’s accounts and has multiple company ID’s attached to these accounts. Tandem has no visibility of knowing if our clients have a filter set up on their account. If you have debit filters on your account, please forward the following Company ID’s to your bank for set up. It is advisable that you set up all ID’s associated with Tandem’s entities.
